

Get U!Flash or U!Fi service together with one of the Dolphin, Panther, Butterfly, Lion, Eagle or Unique subscriptions, get a common discounted bill or enjoy the benefit of using your PC's internet connection on your smartphone. Simply choose the option that suits you best:

Ucom Two in One offer is available for both new and existing customers. If you are already a customer of U!Flash/U!Fi and one of the Dolphin, Panther, Butterfly, Lion, Eagle or Unique monthly subscriptions, just visit an Ucom shop, combine the two services and choose the option that best meets your needs*.

With this offer, the credit limits of your voice monthly subscriptions and internet service will be summed up, due to which you will be free to use your unified credit limit whenever you wish based on your needs. Moreover, the unified credit limit can be fully used for either of the services.

With this offer, any recharge of voice or internet account is also equally applicable to both services.

This offer is called “Two in One”, which may appear before the name of your mobile internet tariff plan, but which does not mean your tariff plan has changed.

If you port one of your numbers of Ucom Two in One service to another network operator, the offer will no longer be valid for you and you will not get a special discount / internet connection sharing benefits.

In this case, you can continue using Ucom services with the other number, unless you have due debts for any of the two services. If you have due debts, you will be able to use the number only after complete payment has been made.

* If you combine Internet subscription with Ucom Unique monthly subscription you can use Together More Affordable and Common Internet options simultaneously.
