

Sharing documents, pictures, videos or music with friends, colleagues or relatives has become even faster with [Ucom Mobile Internet](#).

Subscribers of [U!Flash](#), [U!Fi](#), [U!Box](#) and [Flybox](#) can activate [High Upload](#) service and enjoy upload speed up to [5.76 Mbps](#) on 3G network.

regular upload speed	upload speed with High Upload service	monthly fee	activation
up to 384 Kbps	up to 5.76 Mbps*	1000 AMD	send HU keyword to 111 short number

The service can be activated also through [*111*3#](#) command, by visiting [My Account](#) page or any [Ucom service center](#), as well as for [Flybox](#) and [U!Box](#) subscribers by calling [111](#) with the phone attached to their device. The service can be activated from positive balance or credit limit. [High Upload](#) option can be activated any time during the month, and it will be active until the last day of the given month. This means that it is better to activate the service at the beginning of the month, as it will be automatically deactivated on the last day of the month, even if you have activated it the day before.

You will benefit from it until you consume the high-speed bundle of your monthly subscription. When your high-speed bundle expires, you will not be able to use [High Upload](#), but immediately after the activation of the [One More Time](#) option or [High-speed Bundle](#) it will automatically reactivate without any extra payment.

*5.76 Mbps speed is available in 90% of populated areas of Armenia, in other areas the upload speed with [HU](#) service is up to [2 Mbps](#).

Additional services/bundles are activated after receiving the SMS confirmation message/notification.
