

You use the internet only from time to time? Then **Ucom Internet Mekic Mek** prepaid tariff plan is for you. Use the internet any time and as much you want at 512 Kbps speed, by paying only for the time you surf the internet.

Every day at the moment of accessing the internet for the first time you'll be charged 100 AMD connection payment, for which you will get 100 min to use for **Internet**. Then you can use the internet at 1 AMD/min rate by the end of that day (until 23:59:59). Connection fee will be charged only for the days during which you'll connect to the internet.

Please take into consideration, that at the end of the day the connection will be interrupted and you need to connect again. Before removing USB modem, make sure, that you have disconnected, otherwise it will be considered that you are still connected to internet and you will be charged with more 5 minutes.

You can also send SMSs to all local numbers at 15 AMD/SMS and to international numbers at 20 AMD/SMS rate with your Internet Mekic Mek SIM card.

Internet Mekic Mek offer subscribers cannot benefit from **One More Time**, **High Upload**, **Night Internet**, **Internet Together** and **Kaspersky** services.

To benefit from Internet **Mekic Mek** offer you need to get a new **Internet Mekic Mek** SIM card and modem form all regional **Ucom** shops. You'll need to pay 1000 AMD, which will be fully transferred to your account and you can use it for Internet connection. If you don't have modem you can buy Internet Now 7.2 Mb/sec modem at 5000 AMD from any **Ucom** shop.

To access the Internet you need to insert **Internet Mekic Mek** SIM card into the modem* and connect it to your computer. Installation process will start automatically.

After the installation process finishes just press the Connect button and start using the Internet.

* If you use a notebook, tablet or other device, please insert the SIM card in the dedicated port.

From March 11, the ability to send SMS abroad from the mobile Internet number will be suspended. Continue sending SMS to local networks.
