

uKid

uKid is an alternative solution for you to always keep in touch with your children. Thanks to it, your children will be freer, safer and always accessible, while you will be more relaxed and carefree.

uKid is an amazing 2-in-1 solution:

- smartwatch-phone for kids,
- mobile app for parents.

Key benefits

Child Location

No need to worry, if your child is out of sight. With uKid app you may locate your child at any time: kid's smartwatch-phone is always with your child and helps you locate him.

Safe Zones

Children are curious and always keen to discover new things, which may take them far from their location. With uKid app you may set "Safe Zones" for your child, and whenever (s)he is out of the Safe Zones pre-set by you, uKid smartwatch-phone will send a notification to your mobile app.

Calls and SMSes

You may set the contacts you want your child to keep in touch with. Moreover, your child will receive calls and SMSes only from these very contacts. Simply enter the contacts in uKid app.

SOS Button

You will be immediately notified, if your child finds him(her)self in an emergency and needs your help. In such cases, your child may contact you by pressing and holding the SOS button. You will be immediately notified via SMS.

Agenda Planning

Every child needs some help in managing his (her) time effectively. With uKid app parents may set a daily agenda and send notifications/reminders to their child. uKid will regularly remind him (her) about his (her) daily tasks.

Step Tracking

A healthy child is a joyous child. Thanks to uKid Step Tracker, you will know how much your child has walked through the day.
