included

Due to the uMix service you will have a stable internet, IP television and a fixed phone at the same time and will enjoy all the benefits:

- You will have one common bill for all services, which will make the payment process easier for you.
- By combining the services in one package you pay less.
- All services can be managed from [one website](#).
- Now you may also use [Premium Wi-Fi](#) service and enjoy a larger access space and Internet capacity.

Our modern network enables fiber-optic connection to the internet with up to 1000 MB/s bandwidth. Choose a package that best fits your needs and enjoy stable and high-speed internet.

* Speed is available via wired connection. The speed may be affected by the technical capabilities of the dispersive device, the sensitivity of the Wi-Fi receiver and the surrounding Wi-Fi noise.

** Minutes to all local landline networks (including Ucom), as well as USA and Canada.
